AutoCAD is bundled with the AutoCAD LT (AutoCAD for small businesses) and AutoCAD Professional (AutoCAD for large enterprises) applications. AutoCAD LT is a free desktop application available for Windows, Mac and Linux platforms; it allows users to create 2D drafting and 2D technical design drawings on a PC or Mac. AutoCAD Professional is a commercial desktop application available for Windows, Mac and Linux platforms. Both AutoCAD LT and AutoCAD Professional use proprietary formats, rendering graphics in a vector-based environment. Both of these AutoCAD programs are based on the "AutoCAD" trademark, which was acquired by Autodesk in 2006. The purpose of AutoCAD is to provide the capability to create 2D drawings that illustrate engineering and architectural projects, business plans, interior design and marketing concepts, among other types of graphic design projects. History In 1981, the National Center for Supercomputing Applications (NCSA) developed a computerized drafting system that made it possible to create complex drawings in a graphical environment. In 1982, Autodesk was formed by a team of computer engineers from several universities. The company was named Autodesk Inc. in November 1982. Its first product, AutoCAD, was released in December 1982. The name "AutoCAD" was derived from the computer language ADA, whose acronym stands for application development assembly language. In May 1982, Autodesk launched the World Wide Web. Although the company did not initially release an AutoCAD web edition, Autodesk added support for some web applications in the Autodesk 360 platform in October 2017. An abbreviated version of AutoCAD was introduced for the Apple Macintosh in 1984. By the end of 1985, AutoCAD had a market share of nearly 50 percent. The first version for the IBM PC was released in September 1987, and the first version of AutoCAD for the IBM PC/AT was released in January 1991. With the release of AutoCAD 2013 for Windows 7 and Windows 8, the company stopped publishing hardware requirements for the Windows operating system. The AutoCAD 2013 software requires the following minimum computer hardware: Processor: 1 GHz (equivalent to Intel Core 2 Duo) Memory: 2 GB Video: 128 MB AutoCAD software is not available for the following systems: Windows Vista Mac OS X 10.4 Tiger
